

Carolyn Belle, Senior Analyst, Northern Sky Research (NSR)

Carolyn Belle is a senior analyst for the market research and consulting firm Northern Sky Research (NSR). Her main focus is the international satellite manufacturing and launch market, particularly the trends surrounding creation of diversified space architectures including the growing utilization of smallsats. She is also engaged in research on emerging space markets and government and military satellite communications. Ms. Belle regularly contributes to diverse tailored consulting projects, lending expertise to feasibility studies, satellite procurement assessments, and analyses of competitive dynamics for both start-ups and industry leaders. She came to NSR from the Research and Analysis team at the Space Foundation, where her research efforts primarily addressed new and emerging space products and services as well as International Space Station utilization. She has been active in leading STEM outreach initiatives such as Yuri's Night and Cool Science, and participated in astrobiology research at NASA Ames Research Center.
